Among the myriad skills that special forces personnel must master, special forces hand-to-hand combat (H2C) stands out as a critical component of close-quarters engagement. This comprehensive review explores the history, techniques, training methodologies, tactical applications, and evolving nature of hand-to-

hand combat within special forces units around the world.

The Evolution of Special Forces Hand-to-Hand Combat

Historical Foundations and Military Roots

Hand-to-hand combat has been an integral part of military doctrine since ancient times, with roots tracing back to martial arts practiced by various cultures. Special forces units, however, have historically prioritized stealth, speed, and efficiency, leading to the development of combat systems suited for covert operations. During World War II, units like the British Commandos and American OSS began integrating close-quarters combat techniques learned from various martial arts and street-fighting styles. These early efforts emphasized practical techniques for incapacitating enemies quickly, often without weapons. Post-war, as conflicts evolved into asymmetric warfare, special forces units began formalizing their hand-to-hand combat systems, blending traditional martial arts with modern tactics. The Cold War era saw the rise of specialized training programs tailored to the unique needs of elite operators.

Modern Development and Systematization

Today, special forces hand-to-hand combat is a highly systematized discipline, often involving multiple martial arts disciplines integrated into comprehensive training curricula. The focus remains on efficiency, adaptability, and lethality, with techniques designed for real-world scenarios such as hostage rescue, counter-terrorism, and covert infiltration. Notable systems include: - Krav Maga: Developed

for Israeli Defense Forces, emphasizing brutal, instinctive movements.

- Brazilian Jiu-Jitsu (BJJ): Focused on grappling and ground fighting, vital for control and submission.
- Systema: Russian martial art emphasizing fluidity, breathing, and psychological resilience.
- Close Quarters Battle (CQB) combat systems: Combining striking, grappling, and disarming techniques.
